Product list

## AVReporter Energy Monitoring Software v6.0:

- o Reachable with or without **Anomaly Detection**

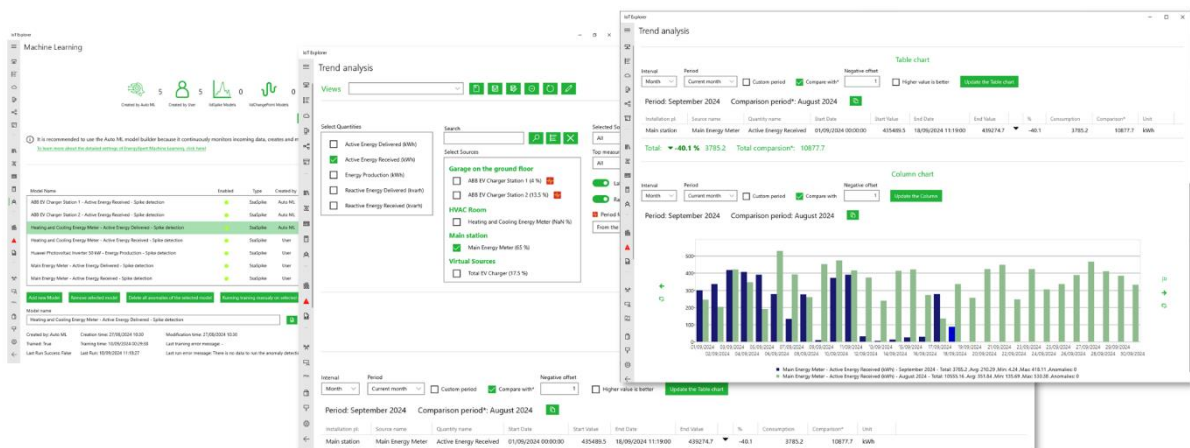

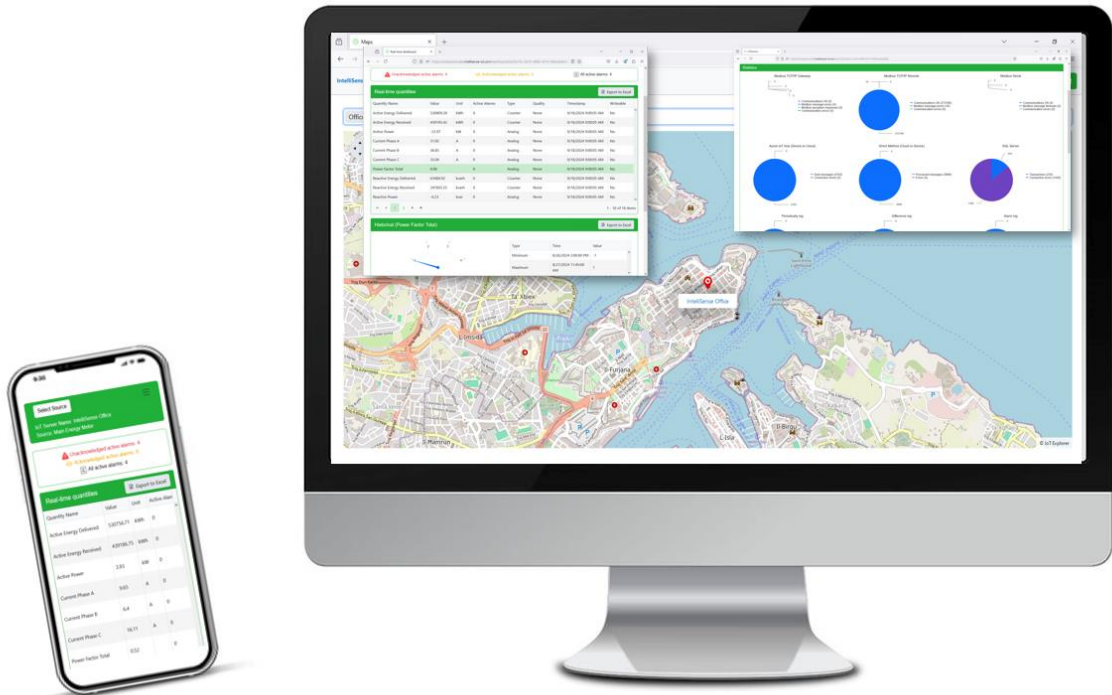

DEVELOPED BY KONSYS INTL

EnergyXpert:

- o An AI-powered, cost-effective energy management solution designed for economic actors, offering real-time monitoring and energy optimization.
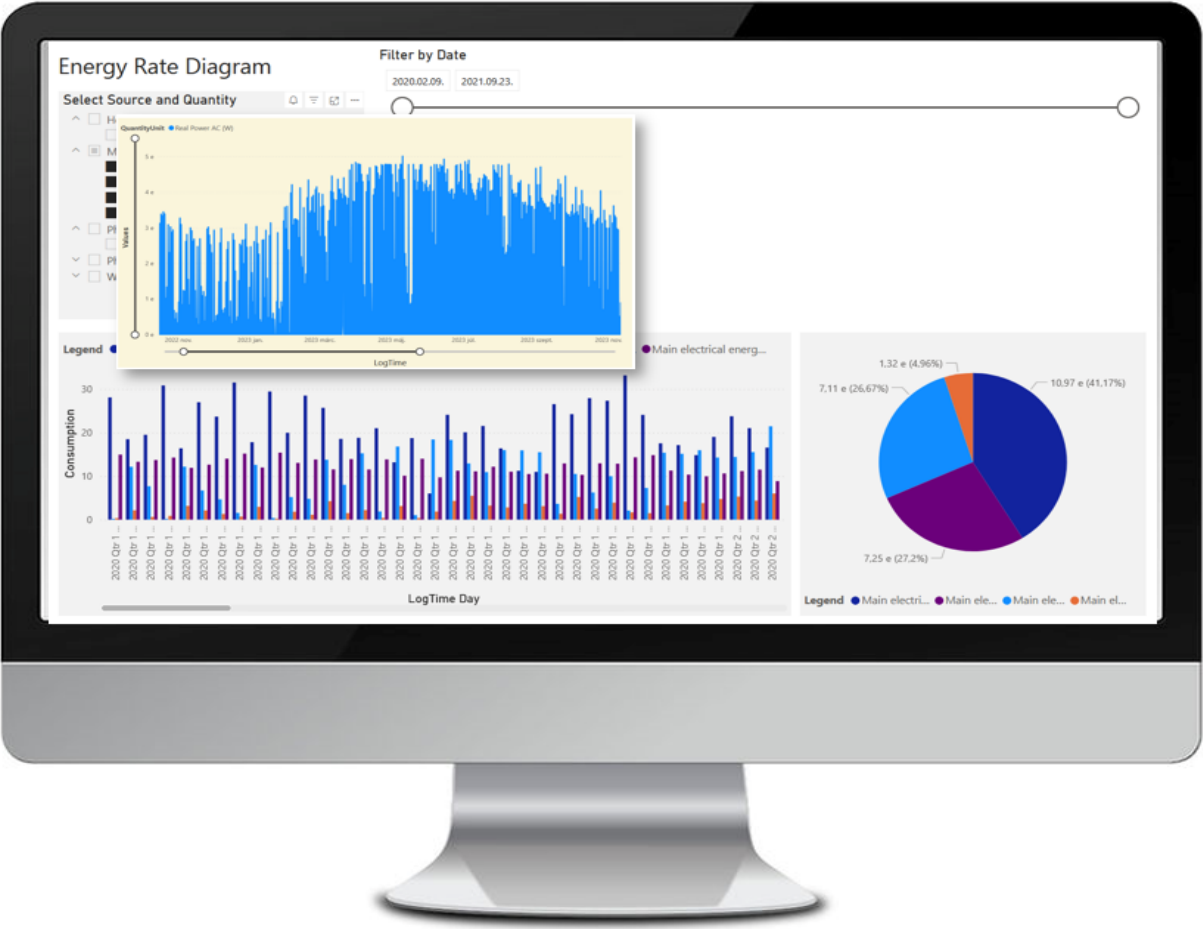

Real-Time Monitoring Solutions (IoT Explorer Webportal):

- o Solutions designed for real-time monitoring and control of energy consumption, which can be integrated into existing infrastructures.

Data Analytics Solutions (Intellisense Cloud with Power BI):

- o Software that provides detailed analysis and insights into energy usage, helping businesses optimize their operations through advanced reporting and anomaly detection.

Integration and Connectivity Solutions (IoT Xserver and GridMaster):

- o Tools that allow seamless connectivity between various energy management components, enabling integration with third-party systems and scalable infrastructures.

Our products cater to a wide range of business needs, from small businesses seeking simplicity and cost-effectiveness to large enterprises with complex monitoring and visualization demands.
